

## PETROLEUM ACT 1998

### Notice of Application for a Submarine Pipeline Works Authorisation

Dana Petroleum (E&P) Limited hereby gives notice on behalf of itself and Tailwind Mistral Ltd in accordance with the provisions of Part I of Schedule 2 to the Petroleum Act 1998 that it has made an application to the Oil and Gas Authority for the grant of an authorisation for the construction and use of a pipeline between the DC1 Manifold and the DC2 Manifold situated in the Guillemot Field.

A map (or maps) delineating the route of the proposed pipelines and providing certain further information may be inspected free of charge at the places listed in the Schedule to this notice from 10am to 4pm on each weekday from the date that this notice is published until the date mentioned in the next paragraph of this notice. Alternatively log on to the following page to view electronically, <https://www.ogauthority.co.uk/licensing-consents/consents/pipeline-works-authorisations/public-notices/>

Pursuant to a direction of the Oil and Gas Authority, representations with respect to the application may be made in writing by email to [consents@ogauthority.co.uk](mailto:consents@ogauthority.co.uk) and addressed to the Oil and Gas Authority, Consents and Authorisations, Second Floor, 48 Huntly Street, Aberdeen, AB10 1SH (marked FAO OGA Consents & Authorisations Manager, Offshore Pipeline Authorisations) not later than 28th April 2020 and should bear the reference "PA/3105" and state the grounds upon which the representations are made.

31st March 2020

*Dana Petroleum (E&P) Limited  
King's Close  
62 Huntly Street  
Aberdeen  
AB10 1RS*

## **TECHNICAL ANNEX**

At the request of the Oil and Gas Authority, Dana Petroleum (E&P) Limited presents the following information about the Guillemot West and North West development:

Dana Petroleum (E&P) Limited will formally notify the Health & Safety Executive of certain details relating to the proposed new pipeline, prior to construction. This is required under regulation 20 of the Pipelines Safety Regulations (SI 1996/825) and applies only to Major Accident Hazard Pipelines, which are defined in the Regulations.

### **Pre-Commissioning Testing**

Suitable pre-commissioning and testing of the pipeline will be undertaken in compliance with the adopted pipeline design code/standard, prior to commissioning.

### **Design Pressure**

The pipeline will not be operated at a pressure greater than that for which it has been designed.

### **Leak Detection**

Flow of fluids through the pipeline will be monitored to enable the detection of leaks at all times.

In the event of a leak being detected the location and significance of the leak will be established and steps will be taken to bring the leak under control as soon as possible.

In the event of a leak likely to harm persons or the environment being confirmed then Emergency Action will be taken.

Where applicable leaks of oils or chemicals will be reported to the relevant authorities in compliance with Petroleum Operations Notice No.1 Guidance. Copies of which can be located at <https://www.gov.uk/guidance/oil-and-gas-environmental-alerts-and-incident-reporting#pon-1>.

Routine surveillance will be carried out along the pipeline route.

## **Emergency Action**

In the event a major release from the pipeline occurs the following emergency action will be taken:

- All fluid delivery into the pipeline will be manually or automatically stopped.
- Pipeline emergency procedures should be implemented, as appropriate.
- The Health & Safety Executive will be notified by the quickest practical means and a report will be submitted under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (1995), where appropriate.
- A survey will be carried out to determine the location of the release and remedial pipeline works will be undertaken as necessary.
- If an oil spill has occurred contingency arrangements will be implemented in accordance with the pipeline Oil Spill Contingency Plan required under the provisions of the Merchant Shipping (Oil Pollution Preparedness, Response and Co-operation Convention) Regulations 1998.

## **Recommissioning**

In the event of any pipeline break or damage, the subsequent modification, maintenance or repair work should be carried out in such a way as not to detrimentally affect the pipeline's continuing fitness for purpose. Notification of such modification or repair work will be made to the Health & Safety Executive under regulation 22 of the Pipelines Safety Regulations (SI 1996/825), where appropriate.

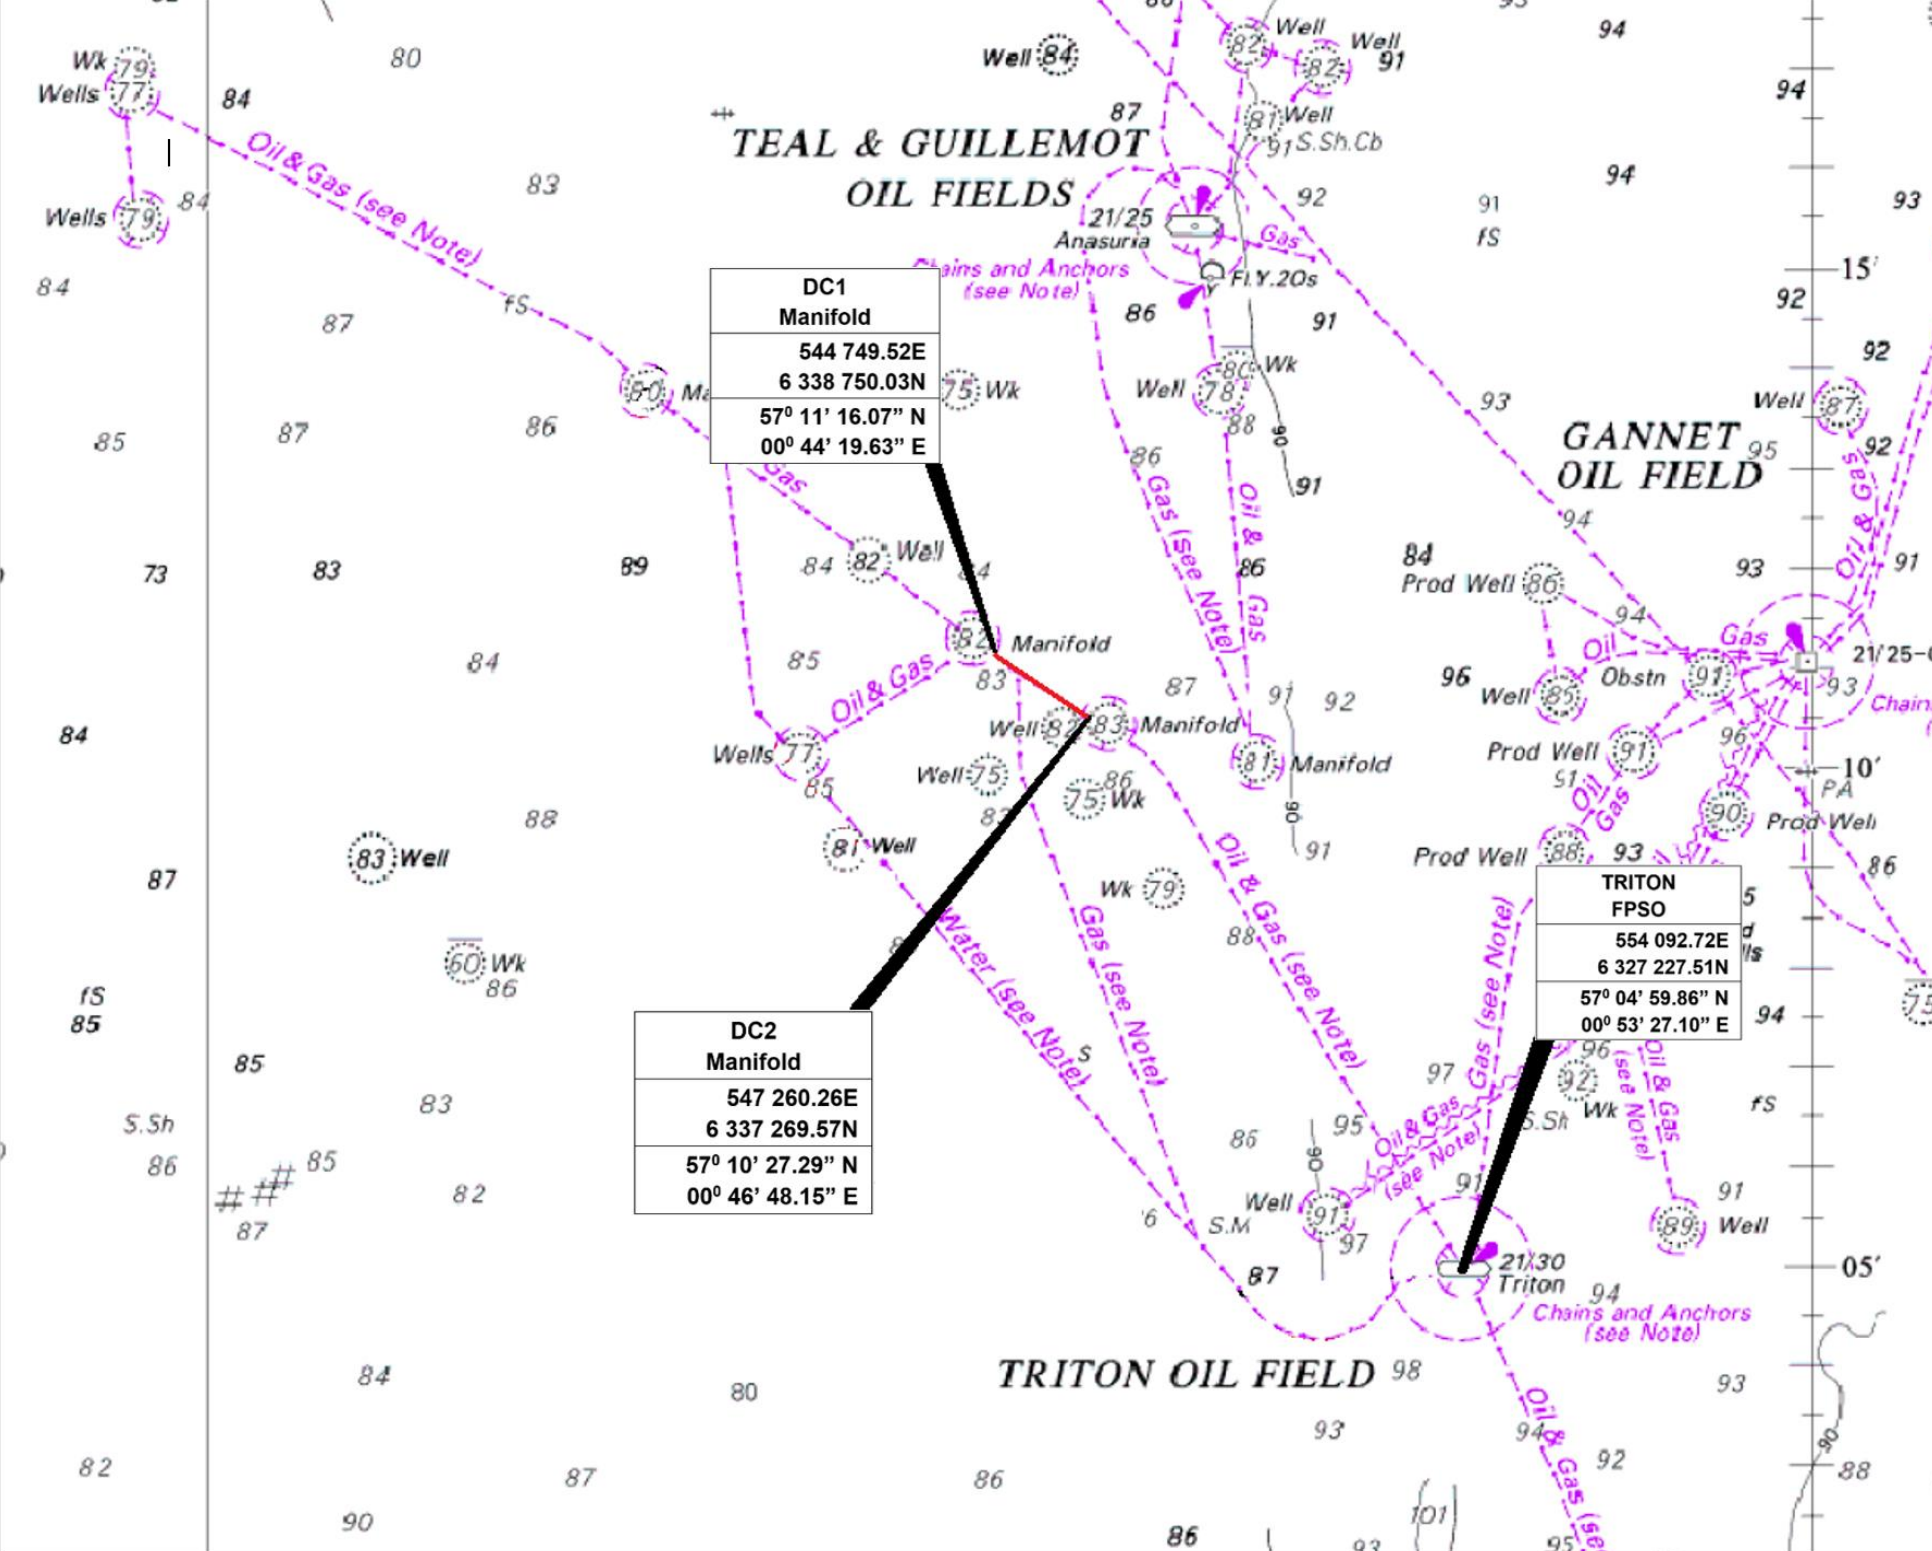

## **On Bottom Stability and Safety**

The pipeline will be laid in a manner that will ensure its safety and stability and the safety of users of the sea under all reasonably foreseeable conditions.

## **Limits of Deviation**

The pipeline will be laid within a boundary of 100 metres on either side of the proposed route.
